FOREWORD

Need an evening out? How about cocktails and dinner at Scholz Palm Garden, followed by the concert at the Beethoven Maennechor? Or, if your tastes run a bit more plebeian, you might enjoy stopping by the Maverick Hotel Bar for a couple of beers and some good fellowship, then on to dinner at Sue Lee's, and afterwards catch the late floor show at the Fashion Theatre. And for those of you who like to pull out all the stops and live a bit dangerously, we recommend the Western Star Saloon, Cockpit and Gambling Hall.

All of these good time places — and many more — were available to you if you had lived in old San Antonio in the 1890s. Trade tokens from these establishments, along

with some 3,000-plus more from across Texas, are described in this document. And each one contributes its part to the history of the state — its exploration and settlement, colonization by the oppressed peoples of mid-19th century Europe, its growth as a great cattle and cotton empire, the discovery of oil and the impact of the petroleum industry on the economy — not to mention the change from strictly rural to a highly urbanized society as a new wave of carpetbaggers flows into our cities and changes them to sprawling metroplexes.

The tokens described here are the ones that have surfaced since *The Trade Tokens of Texas* was published in April, 1973 as Part II (Volume 13, Number 2) of the *TAMS Journal*. A lot of water has passed over the dam in the intervening years. One of the co-authors, Travis Roberts, withdrew from the project because of his need for more time with a growing family and expanding business responsibilities. Another, Harry Strough, has passed on, but not before he had contributed materially to this document, which has been in preparation for almost two years. He is, consequently, listed as co-author of the supplement, which is also dedicated to his memory.

ABOUT THE SUPPLEMENT

The Supplement actually had its beginnings with the response to the Trade Tokens of Texas (hereafter TTT) upon its publication. Many TAMS members and others sent in descriptions of unlisted Texas tokens they had in their possession at that time, and some have continued to provide information as they subsequently acquired additional pieces. It was not until the spring of 1976, however, that we felt that we had accumulated sufficient data to justify publication. We then began the preparation of the supplement — a task we thought would take a couple of months, but which somehow has managed to take a couple of years. During the course of preparation, we have continued to receive and process information on new token finds — and plan to keep on doing so until the document is forwarded for publication. After that, we'll begin a new file and record all Texas token information that may become available to us. Perhaps in another five years we may gather enough additional date to justify a second supplement. Who knows?

A great many of the tokens described in the supplement were issued by business establishments previously listed in TTT as token users. When this is the case, we have inserted the letters "AL" in parentheses before the name of the firm to indicate this to our readers. We have also used the letters "ALS" in the same manner in the Late Arrivals section to indicate a firm listed in the catalog section of the supplement.

This "AL" symbol simply means that the business firm has been listed previously, and that we are listing new denominations, newly discovered varieties or — in some instances — tokens quite different in design and physical characteristics from those previously listed. We also have used these symbols for re-entry of firms when we want to report interesting historical information or other pertinent date that has come to our attention.

Almost all of us get a quickening of the pulse when we run across a token from a location — city, town, village, cross-roads or secluded country store — for which no tokens have previously been reported. Several of our good Texas collectors collect only by town, saving a single token from each location. To help collectors readily determine the new locations listed in the supplement, we have placed an "N" in parentheses after each such location. You will find some 300-plus of these (N) listings in this document.

One other innovation in the supplement is the underscoring of words and figures in the legend to show they are incuse rather than raised printing. This simple device eliminates the need for giving an explanation in each such case.

Although statistics make for rather dull reading, this is probably as good a place as any to tell you that TTT contained listings of approximately 600 locations with token-issuing establishments, 1,600 such establishments, and 2,250 tokens. In the supplement we are listing about the same number of locations — over half of them new ones — around 2,500 token-issuing establishments, and some 3,200 tokens. These figures are not exact, so please don't count them. Some of them are by actual count, but others were reached by extending random samples.

Texas collector Jim Ruhland (TAMS #1713) in his October 1972 **Journal** article "Playing With Numbers" — with tongue in cheek and a bit of numerical legerdemain — arrived at an estimate of 23,809.5 total Texas tokens. If Jim is anywhere near right, we still have quite a way to go to get them all listed.

RELATIONSHIP BETWEEN TTT AND THE SUPPLEMENT

Although this document is supplementary to TTT, we have attempted to make it as self-contained as possible to enhance its interest and usefulness to those TAMS members who do not have a copy of the April 1973 publication.

On the other hand, we have felt a responsibility to those members who do have TTT to tie the supplement into it in a manner that will facilitate their use of the two documents together. The use of the "AL" and "N" symbols, as explained above, is an effort to do this. In addition, we have purposely retained the format used in the first document and tried to adhere to it faithfully in the preparation of the manuscript. This should make it possible for those people who may wish to combine the two publications to do so with a little cutting and splicing job.

To those of you who do not have TTT, but would like to obtain a copy, there were — at last accounting — some still available. TAMS Secretary Dorothy Baber will supply them at $5 per copy as long as the present supply lasts.

OMISSION OF PRICES

The single most significant difference between TTT and the supplement lies in the fact that we did not attempt to price the tokens in the supplement. When we first

contemplated the issuance of a second document, we polled the Texas collectors known to us as to their wishes on this matter. With but one exception, they voted unanimously against pricing the tokens. The consensus was that token prices are too unstable for any published price list to remain reliable over any sustained period of time. To demonstrate this, numerous examples were cited of prices in TTT that had proved to be pretty far off target. For example, the Cameron Ice & Cold Storage Co. tokens listed at $7.50 are now quite common and no bargain even at the $1 minimum list price. On the other hand, there are some tokens that today are bringing many times list price. The Ball's No. 6 Main Plaza token from San Antonio, listed at $2, is one of these. Actually, this was the token of the Revolving Light Saloon, one of San Antonio's better known drinking establishments.

It was also the general opinion among Texas collectors that it would be next to impossible to gather adequate information on supply and demand, prices realized at auctions and on mail-bid sales, and similar factors needed to provide a sound basis for the valid pricing or ranking of any substantial percentage of the Texas tokens. Consequently, we gave up the idea of using any sort of pricing index or rarity table, even though we are aware that this decision may not be a popular one.

ACCURACY OF TOKEN DESCRIPTIONS

"To err is human, to forgive, divine" is something more than an old adage that has been handed down to us by Alexander Pope. The first part of the quotation is the bane of all cataloguers; the forgiveness part we leave to the indulgence of our audience.

We have been amazed by the errors we have found — and continue to find — in TTT. For those who have that document, we are attaching, as an appendix to the supplement, a listing of the more pertinent errors that we have noted. We have not attempted to correct minor errors of spelling or punctuation, or discrepancies of only a couple of millimeters in size. Also, we have not made corrections in some instances where the description is in error, but the accompanying illustration plainly shows the correct information.

Since errors continue to show up, we are sure we have not listed all of them, but we hope the error sheets will be helpful to those token buffs who have a passion for accuracy. No doubt this supplement will also have its share of errors, but we have tried very diligently to make the manuscript error-free, and hope for substantial improvement over TTT.

CONSISTENCY IN REPORTING

In cataloguing, consistency is perhaps more difficult to attain than is accuracy. Once you have determined the format you will use, and have established standards for alphabetizing and listing your material, it would seem to be a simple matter to go right down the line and catalogue everything in accordance with the rules you have set for yourself. Unfortunately, it doesn't seem to work that way. Time is a factor. The longer you work with your material, the more likely you are to deviate from your standards. Too, the human factor enters in. It seems only natural for us to alter, to improvise, to attempt to improve the product as we go along.

Moreover, when you are in a position where you are receiving information from a great many sources, your problem of consistency reporting is compounded. Some people are, by nature, more observant, more careful, more detail-minded and more sensitive to standards than are other people. One collector will report everything on a token — punctuation marks, ornamentation, distinguishing marks, and so on. Another will give the same token a broad brush treatment, and report only the information he feels is needed to enable the reader to recognize the token.

This leaves it up to the cataloguer to decide what information he must have before he will list an item. Some cataloguers will not list a piece at all unless they personally have seen it, measured it, and jotted down the information they think essential to proper cataloguing. We have not been so discriminating in our cataloguing efforts. We have tried faithfully to report the information provided us. In a few instances we have asked for additional data, but generally we have accepted that given to us if it looks reasonably accurate. Our feeling is that it is better to list tokens than to attain total accuracy and consistency.

ATTRIBUTION OF MAVERICKS

In listing mavericks that have been attributed by other collectors, we have accepted the attributions if they seem reasonable, and listed the tokens. Here again, we have asked our contributors to exercise due care and be sure their determinations are supported adequately by the available evidence. We followed these same guide lines with TTT, and the maverick attributions reported there have held up remarkably well.

We failed to provide an index to the attributed mavericks in TTT, an oversight that was brought to our attention several times. To make amends, we are providing an index not only to the attributed mavericks; but also — as an extra aid — an alphabetical listing of the towns covered in the supplement, plus a similar listing of towns covered in TTT but not listed in the supplement.

COVERAGE

As with TTT, the supplement is primarily a catalog of the trade tokens and store cards issued by retail stores and service establishments. We generally have excluded transportation tokens, military tokens and so on that have been listed in authoritative works by recognized authorities in their respective fields. For example, we have omitted military tokens catalogued by James J. Curto in his *Military Tokens of The United States*, as well as those listed in the recent excellent *Texas Military Tokens And Chits*, by Richard D. Worthington of El Paso.

We also have excluded food stamp tokens, wooden nickels, encased cents, good luck pieces, and anniversary

pieces issued by banks and other private establishments and by municipalities and other governmental entities. These have been listed, however, if they also served as a token. Moreover, we have not hesitated to list an item in any excluded category if we thought it of particular interest to our readers.

Whenever we have had an interesting story to tell about a listed token, the issuing individual or business establishment or the community where the business was located, we have continued the practice started in TTT of including a brief narrative with the listing. We hope you will have as much fun reading them as we have had in writing them.

ACKNOWLEDGEMENTS

Everyone who has provided information for this supplement or otherwise contributed to the project has our sincere gratitude. It goes without saying that without your help we could never have gotten it off the ground. A list of contributors would read like a Who's Who in Tokendom. In the absence of such a list, we hope that each of you will find your satisfaction in the finished product that you helped to produce.

Those collectors of Texas tokens whose signatures appear on the dedicatory page have put forth every effort to make the supplement an appropriate memorial to Harry Strough.

Tokens used as illustrations are from the collections of the co-authors, and those of John W. Byards, Jr., Leo J. Warren, and Richard B. Worthington. Other illustrations are used through the courtesy of the Austin-Travis County Collection of the Austin Public Library and the Barker Texas History Center of the University of Texas at Austin.

We are obliged to Charles N. Berger of Corpus Christi for his *Texas Saloons And Proprietors 1878-1914.* This computerized listing has made research in this important area infinitely easier.

Finally, our thanks to the TAMS Journal for making this work available to its membership, and especially to Editor Doug Watson, whose design talent and technical know-how have contributed substantially to its appearance and readability.

Other:

(AL) — Additional listing for firm first listed in TTT.

MFGR'S STAMP: — Used to introduce reverse legend carrying identifying information on the maker of the token. Not a precise usage, as some of these firms are known to have been token distributors rather than manufacturers.

(N) — New town or location not listed in TTT.

Underscoring — indicates incuse letters or figures.

These tokens were issued before 1914 when the bakery moved to 103 Congress. This was the first of several moves made as the business prospered, and became primarily a wholesale operation. It became the first county seat when Taylor County was established in 1878, but the seat of government was moved to Abilene in 1880. W. A. Gray is listed in the 1882 Texas Gazatteer as a Buffalo Gap saloon proprietor.)

Across the Rio-Grande from Eagle Pass lies the Mexican city of Piedras Negras — once known as Cuidad Profirio Diaz, but renamed after Presidente Diaz' abdication in 1911. Around the turn of the century the saloon keepers and other merchants catered to the American cowboys from across the border — just as they now welcome American tourists. In connection with our Eagle Pass listing, we offer here a few of the early tokens from across the river:

Stevens was proprietor of the Acme, and it is believed that the die-tokens were in use there at the time — August 19 — John Wesley Hardin was gunned down from behind by "Old John" Selman.)

Then, when bartender Walter James served his drink, he pulled his gun, leveled it at a row of glasses on the back bar and pulled the trigger four times. The bartender looked him squarely in the eye, reached under the bar and calmly pulled his own .38. He also fired four times — but not at the glasses on the back bar.)

Good For / 10¢ / in Trade A-Oct-26

(Named for Quanah Parker, last chief of the Comanche, son of Peta Nocona and Naduah — the Indian name for Cynthia Ann Parker. Cynthia Ann, then about 9 years old, was taken by the Comanche in a raid on Fort Parker — near the present town of Grosbeck — on May 19, 1836. Seven years later a trading party found her on the Canadian River, but she told them she was happily married to Peta Nocona, had borne him two sons, Pecos and Quanah, and had no desire to return to her Texas relatives. She was captured at the Battle of Pease River in 1860 but never became reconciled to her new environment. She died in 1864. Cynthia Ann's story captured the imagination of the American public and became perhaps the best known of many similar frontier Indian-adoption cases.)

Fashion / 25 / (TOKEN MFGR'S NAME: The Heidemann Mfg. Co. S.A. Tex.)
Uniface WM-Rd-28

Fashion / 10 / W & L
Uniface WM-Rd-22
(This token is likely one of a kind. The "10" is struck over the incuse logo of the Heidemann Mfg. Co. of San Antonio. Many pieces of this kind have surfaced in San Antonio in recent years — some only partially struck, others over-struck, errors, etc. They probably came from the cabinets of the Heidemann Company. This firm struck many of the beautiful pictorials that characterized the San Antonio tokens of the 1880's and 90's.)

Sue Lee / Fashion / Theatre
25 (WITHIN CIRCLE OF STARS AND ROSETTES) B-Rd-25
(The Fashion became San Antonio's leading entertainment palace after the killing of Ben Thomspon and King Fisher in 1884 put a damper on the Vaudeville. Some San Antonio historians believe Sue Lee was the name of one of the girls at the Fashion, as the San Antonio theatres of the day provided several kinds of entertainment; however, a more plausible explanation is that this is a dual token, good either at the Fashion or at the Sue Lee Restaurant which was just a short distance away at 3 N. Flores St.)

Sixty Years In Texas / (IN CENTER "10" WITH AN ARC ABOVE AND "SAUNDERS" BELOW) / Fort Worth-San Antonio
B-Rd-30
(This piece listed only under Fort Worth in TTT. George Saunders life reads like an Horatio Alger novel. Born in 1854 in Gonzales County, he went up the Chisholm Trail with a drove of cattle when he was seventeen. Later, he moved to San Antonio and went into the live stock commission business. By 1915 his offices in San Antonio and Fort Worth were doing between 5 and 6 million dollars worth of business a year. He helped organize the San Antonio Union Stock Yards and the Old Trail Drivers Association. His name is still known wherever cattlemen gather.)

John J. — Black Jack — Pershing about France in the sidecar of his motorcycle. He opened Tip's Place after the War, and took its name from the then popular song, "Its A Long Way To Tipperary". Although beer is served, Tip's is primarily a modest restaurant serving Belgian goodies to its clientele which comes in large part from the sprawling Kelly AFB.)

Uniface A-Rd-28
(This hand-made token has been used by Ben Castellijo, Sr. of Sonora in his shearing business. The sheep shearing business is still going strong, but the tokens are being phased out. This type token is interesting because it demonstrates ingenuity on the part of the user to solve his own accounting problems. The letter that looks like an "R" is actually a broken "B".)

Index to Attributed Mavericks

For the benefit of those collectors who enjoy chasing down the elusive maverick, we present here an index to the attributed mavericks listed in this document. The tokens listed in this index, plus those given in "Texas Maverick Tokens" by John H. Ribbe (TAMS # 2447) in the October 1975 TAMS Journal, constitute a comprehensive inventory of all Texas mavericks known by us to have been attributed to date.

Our method of selecting tokens for this index differs from that used by Ribbe. If the token has the name of the town (but not the state), we have not included it in the index. We have also excluded those tokens where the name of the issuing business establishment includes the name of the town in which it was located, as for example: Bedias Candy Kitchen; El Paso Dairy Company; San Antonio Mint Company, etc. As a further aid in identifying this type maverick, we also are including an index of the towns listed in this document.

Errata Sheet For The Trade Tokens Of Texas

In the several years that have passed since *The Trade Tokens of Texas* was published (*TAMS Journal*, Volume 13 No. 2 Part II, April 1973) there have come to light a number of errors, both of omission and commission, that we feel the discriminating collector of Texas tokens would like to have corrected. To this end, we list here corrections to those errors that we feel might have a bearing on the proper attribution of the tokens involved or on the accuracy of the historical comments relating to them.

ALBA — The Thompson Edwards Co., et al, $5 token is octagonal rather than hexagonal.

ALICE — The Garrett Well token is for one barrel of water, as shown in the illustration.

ALTON — The historical note on Alton is in error. This Alton was on the San Benito and Rio Grande R.R. in Hildago County.

ARNOLDS MILL — The J.L. Arnold token listed at 17mm's has since been reported at 20mm's.

AUSTIN — Although there was a Bismark Saloon at 815 Congress, this token was from the Old Bismark at 809 Congress.

The R.M. Hahn token shows R.M. Hahn in the line description and R.H. Hahn in the historical note. R.M. is correct.
